As soon as the train stopped Traindiseased meat had been shipped by Ira
H. Smith, a Goshen dairyman, and Dr.
Samuel K. Johnson, a veterinarian to
the Board of Health, was sent to make
an examination of the herd. His report
was submitted this morning to Dr.
Roberts.
He stated that out of a herd of twenty-four mileh cows. he found that four
were suffering from tuberculosis in its
worse stages; that others showed undoubted symptoms of disease, and that
the whole herd was likely to become
affected.

As soon as the train stopped Trainmaster Hay jumped on the engine and
ran it to the round-house. The Commonwealers left the cars and have gone
into camp. Fires will be drawn from
all engines and the Industrials kept
here.

is put on sale and most of it is consumed.

Mr. Smith, when questioned by Dr. Johnson as to why he had butchered the tuberculosis cow and shipped it to New York, stated that the cow had an injured leg and was unprofitable as a milk producer.

He denied that he knew the cow was afflicted with any disease, nothwithstanding that he had been in the dairy business a number of years and had seen many cases of tuberculosis.

The Board of Health, however, declares that Mr. Smith must have known that the cow was diseased, and that therefore the meat was unfit for consumption.

therefore the meat was unfit for consumption.

The whole herd, Dr. Roberts thinks, will undoubtedly be condemned and slaughtered by the State Board of Health, the members of which are fully alive to the dangers arising to public health from such sources.

Dr. Roberts has not made up his mind whether or not to prosecute Smith, but declares that whatever the determination of the Board of Health might be in this particular instance, the next person whom it could be found was guilty of selling diseased meat or milk to New York would be prosecuted to the full extent of the law.
